Power Gensets – Marine and Industrial

From small, convenient budget generator sets (gensets) to massive 3-phase gensets packing 2058kVA, every power need is met at THT Marine Sales.

We stock gensets for land and commercial applications, as well as a complete range of marine diesel generators for sale in Perth.

Industrial Generators

Uses for industrial gensets can vary, from a power supply for a home that's off the grid to a portable power source in a mine where outages can be life threatening. Industrial generators replace or even boost your current power needs.

THT stocks industrial strength gensets for the jobs that need reliable, clean running power. Our massive range that comes direct from Italian manufacturer Coelmo, all include Perkins or FPT (Fiat Powertrain Technology) diesel engines.

Starting at 9kVA, THT's complete range steps through 15, 20, 30, 100kVA right up to the titan of gensets – the 3 phase, 16 cylinder 2058kVA genset.

Marine Diesel Genset

With the possibility of logging two to three times more hours than your main engine(s), the marine genset is a seriously important piece of on-board machinery. Really, the only way to determine what's right for your boat is to talk to our fully-trained technicians at THT Marine.

We offer a complete range of marine power generators from Coelmo and Paguro. Both come in open sets and soundproofed designs to allow for a more enjoyable on-board experience. Coelmo designs open at five sides to facilitate easier maintenance and operation.

Anti-vibration rubber mounts also come in some models, adding to quieter use while marine generators are available in store for heat exchanger and keel cooled vessels.
